Subject: Microsoft Settlement

Regarding the porposed Microsoft Anti-trust settlement:

This settlement is a joke. It does nothing to stop their behavior. The Justice Dept. needs to go for a punishment that is a real punishment, and not a slap on the wrist.

Such as:

- a.. Break them up
- b.. force them to Open Source their code
- c.. force them to document ALL Windows API's
- d.. fine them and donate then money to Open Source projects

Please do not let them off so lightly. They have cost this country billions with their bug-infested, virus-friendly shoddy software.

Thank you
